MICROLINK NETWORKS is an independently-owned company HQ based in Houston, Texas. We have been supplying solutions to the telecommunications, hospitality, security, automation industry for over decades and have grown from what was once a small company to become a major industry player. This growth enables us to consistently offer you the best performing solutions based on our high-value products and full-line support. We built our reputation on them to provide superior inter-connectivity product designs and solutions for you. We stand behind our mission statement.

## Made in the USA

We are committed to quality products, with the most advanced features and capabilities for our customers. Most of our products are designed and manufactured in the United States. A subset of our products are designed in the US but assembled elsewhere.

## QUALITY

MICROLINK NETWORKS products are consistently rated higher in performance and overall value by industry installers. We keep concentration, innovation and progression on everything we do, and never stop getting better. Our products are tested to comply with strict FCC, TIA/EIA, and UL standards. Our comprehensive warranty programs confirm that we stand proudly behind our products and our products meet or exceed industry standards such as UL, CSA, and TIA/EIA. MICROLINK NETWORKS is a proud member of BICSI.

## INNOVATION

MICROLINK NETWORKS has become a highly respected manufacturer of innovative products, by providing peak performance and intelligent solutions to the telecom industry. Throughout the industry, MICROLINK NETWORKS is acclaimed as a preeminent source for developing imaginative, precision products engineered to help you evaluate your technology options and implement the right communications, infrastructures.

## INDUSTRY ASSOCIATIONS

We are proud to be affiliated with the following association and organizations

# How **MICROLINK** has evolved

## What We Do?

At MICROLINK NETWORKS, we develop & innovate high quality Infrastructure, Automation & Security products to help you to build your advanced security surveillance system and infrastructure to achieve your objectives.

#### **INFRASTRUCTURE**

We at MICROLINK can provide you with the finest end-to-end solutions to transform your current facility into the connected and efficient infrastructure of tomorrow.

#### DATA CENTER

From consolidation and cost control to quick deployment and zero downtime, MICROLINK Fiber Optic and Copper Structured Cabling solutions create the data centers of tomorrow.

#### **NETWORK**

We develop Next-generation Data network solutions, with hyper-scale and ultra-low latency and provide state of the art infrastructure solutions public and private sectors and data centers across the globe.

### **SECURITY**

We create and focus on advanced VMS, surveillance hardware, & developing customer relationships and we are motivated by the creative approach & processes which enable us to deliver quality products and support to our partners.

## **AUTOMATION**

At MICROLINK we innovate the next generation of smart living and provide all kinds of automation, access controls, hospitality, SMART home solutions and much more. our services include full scope end-2-end industrial automation design and process optimizations.

#### PARKING SOLUTION

We offer complete parking management solutions featuring SMART parking guidance and integrated management solutions ranging from small-scale buildings to large-scale high-density projects like universities, government buildings, courts, exhibition centers, hotels, shopping malls, factories, airports, drydocks, public parks and sustainable cities. Our intelligent services are integratable, scalable and affordable.

## COMPLIANCE

What makes MICROLINK products consistently rated higher in performance and overall value by industry installers. It's our stringent quality control procedures that assure that our products have been inspected &/or tested to comply with strict TIA and UL standards. In today's marketplace, there are many different manufacturers offering structured cabling products, but not all of them have their products tested and verified by Underwriters Laboratories Inc. (UL) or ETL.

#### ISO 9001:2015

MICROLINK is ISO 9001:2015 certified. These quality management standards, maintained by the International Organization of Standardization (ISO), provide a number of business process requirements for consistent product manufacturing and delivery to meet customer's expectations.

#### **EU RoHS**

MICROLINK products meet the applicable requirements of Directive 2011/65/EU of the European Union Restriction of Hazardous Substances (RoHS) and will continually do so as the directive is updated and amended.

#### CE

MICROLINK products comply with CE. The CE marking is a mandatory European marking for certain product groups to indicate conformity with the essential health and safety requirements set out in European Directives.

## **FCC**

MICROLNIK products comply with the requirements of FCC Part 15 Subpart A Rules. The FCC is a certification mark employed on electronic products manufactured or sold in the United States which certifies that the electromagnetic interference from the device is under limits approved by the FCC.

#### NDAA

MICROLINK is pleased to affirm that our product portfolio, which includes solutions marketed to the US government, Department of Defense (DoD) and associated contractors and affiliates, is fully NDAA-compliant.

At MICROLINK we comply with the Trade Agreement Act (TAA) (19 U.S.C. & 2501-2581) which was created in 1979 and is intended to foster the growth and maintenance of a fair and open trading system. TAA compliance requires that the U.S. Government (including GSA) acquires only U.S. - made or certain "designated country" end products.

## Worldwide Presence

MICROLINK Networks can be located across the globe. A truly GLOCAL (global + local) footprint stretching across five continents means an extended outreach to our clients at a very personal level. Offering quality service and never ending communication, our country representatives speak your language and stay at your service, just-a-call away. We take hassle out of equation. Our processes are built around your needs.

Thanks to our worldwide distribution networks, Microlink focuses on seamless transactions with absolute peace of mind. So, next time when you're inquiring, ordering, receiving, replenishing, or indulging yourself in any other transaction with Microlink, rest assured that we're working tirelessly to give you a great experience.

MICROLINK NETWORKS products are consistently higher rated in terms of performance and after-sales support fostering better brand value and harvesting overall customer satisfaction. Industry players continue endorsing Microlink Networks for quality and efficacy. Focused concentration, out of the box innovation and non-stop progress is the hallmark.

At MICROLINK, we raise the bar every day, to grow, rise and shine by meeting and exceeding your expectations. Microlink products are strictly in compliance with FCC, TIA/EIA and UL standards

## Legacy

Over the years, MICROLINK NETWORKS has acquired a wide portfolio of brands each bringing their technologies & expertise to our value offers. Following are our associated brands:

## Team

MICROLINK as pioneers adopting government's local content policy, our team comprises of fully certified engineers, technical cadres and commercial business professionals

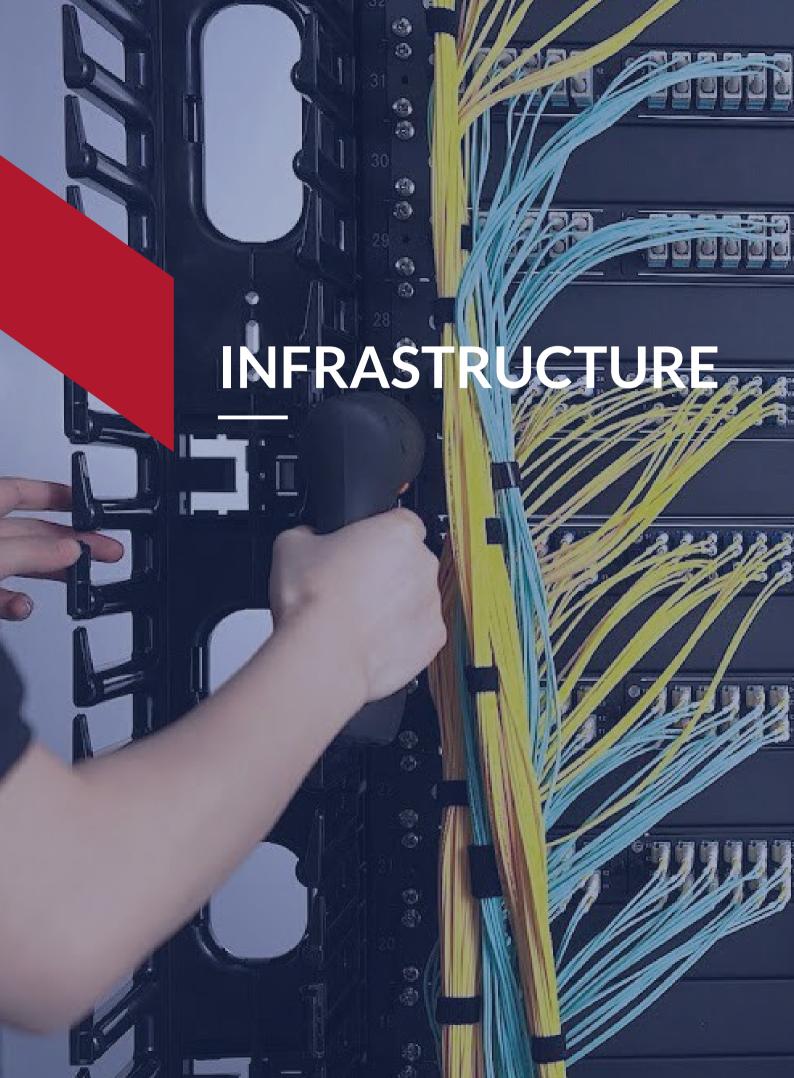

## Partner Network

We boast a solid ecosystem of distributors, panel builders, system integrators, contractors and retailers ensuring that our products are available wherever our customers need them.

Microlink Networks Infrastructure Solutions support commercial and residential networks around the world with an unparalleled selection of high-performance passive infrastructure products.

We understand the importance of readying your infrastructure for higher speed, better scalability, and lower total cost. Whether you're an enterprise, a multi-tenant, commercial, a service provider or a data center, we at MICROLINK can provide you with the finest end-to-end solutions to transform your current facility into the connected and efficient infrastructure of tomorrow.

Britcall offers a complete new phone system that's most effective and helps you reduce costs and increase your customer satisfaction for all kinds of industries.

We provide a system that typically manages all the hotel's internal and external telephony communications and its behavior. Internal calls in hotel phone systems are typically calls between guests and the front desk or other hotel facilities as well as calls among hotel employees.

In busy hotel environments a communications system needs to integrate with hospitality applications so that staff can focus on being productive and manage guest experiences. From small economy hotels to large resorts, guests often rate experiences such as ease of interaction with staff and communication as a top factor. Good communication is essential for a successful hotel with the phone system and hospitality apps laying the foundation for that success. By streamlining services and optimizing staff productivity hotels can improve services and maximize guest experience.

## LIFETIME WARRANTY

What is Lifetime Warranty?

A Lifetime Warranty means that products enjoy a warranty within their own practical life. For example, the practical life of transceivers is about 5 years in normal applications, so the lifetime warranty on transceivers would be 5 years.

#### Qualifications:

Offer lifetime performance limited Warranty with certification and at least one certified designer and installer on staff

- 1. Must be registered as an Elite Installer prior to installation.
- 2. Must install Microlink Networks category-rated connectivity products, plus Microlink Networks horizontal premise cable as an end-to-end Permanent Link solution.

## 25 Year Performance Warranty

Only Through MICROLINK NETWORKS Installers

My Dogo of the Man of the Control of Coverage: Guaranteed system performance end-to-end for 25 years from the date of installation. Coverage includes the replacement of Microlink Networks products only.

#### Qualifications:

Offer 25 years limited Warranty with certification and at least one certified designer and installer on staff.

1. Must be registered as an Elite Installer prior to installation. 2. Must install Microlink Networks category-rated connectivity products, plus Microlink Networks horizontal premise cable as an end-to-end Permanent Link solution.

## **TECHNOLOGY PARTNERS**

We test & certify hardware and software from leading manufacturers for use on MICROLINK products. Testing helps to identify & eliminate many installation, performance, operational challenges and issues, in advance of customer installation, for risk free deployments & smooth continuing operation.

Our products are compatible, integrate well and allow joint development of innovative products and solutions
