Durability

FORCE X DC

19" NET MOUNT

The 19" mount concept has been fully redesigned to ensure optimum cable organization of the equipment. The mount has a number of strategically placed holes which provide great versatility in the location of cable management accessories, such as protective frames, rollup spools and horizontal management fingers for each 19" unit.

SIDE CABLE TRAYS

The cables running down inside the rack are supported by the cable tray which, in combination with the fingers, the grommet rings and the rollup spools, assist in the correct distribution of the inner cabling. The location of the tray in the cabinet is fully adapted to the cable entry, allowing smooth, continuous flow of the cables, with no sharp bends.

CABLE ACCESSORIES

The new FORCE-X DC has a wide range of accessories that assist in managing and arranging the rack cabling. Different section grommet rings, horizontal management fingers, optic fiber rollup spools, -1side and -2sides 19" horizontal organizers with rings, protective frames..., all of them made of plastic and with rounded edges to avoid harming the cables

- Powerful Dynamic design
- Extra productive space
- Adjustable Front and rear device mounting brackets
- Ease of installation
